Yang Zhongyu

+86 13437555149 yangzhy21@lzu.edu.cn Homepage
Google Scholar ORCID GitHub
Shenzhen, China

Research Interests

Fields: Computer Vision, Computer Graphics, Image Analysis, Economics
Topics: 2D/3D AIGC; Multimodal understanding, generation, and interaction
Objective: My long-term research goal is to develop intelligent machines that can actively perceive, analyze, and interpret human states, behaviors, and underlying motivations in dynamic scenes.

Education

- **Lanzhou University (Project 985)** *Sept. 2021 - June.2025 (Expected)*
  B.S. in Mathematics(the Basic Theory Class)(Main major) and Administrative Management (Minor) Lanzhou, China
  - Relevant courses: Mathematical Analysis, Advanced Algebra, C++ Programming, Probability Theory, Ordinary Differential Equations, Numerical Analysis, Microeconomics, Differential Geometry, Functional Analysis, etc.
- **The Chinese University of Hongkong, Shenzhen** *April. 2024 - Nov. 2024*
  Research Assistant in Laboratory for Intelligent Autonomous Systems (LIAS) at School of Data Science Shenzhen, China
  - Advisor: Zhang Ruimao
- **King Abdullah University of Science and Technology** *Dec. 2024 - Present*
  Remote Research Intern in Vision-CAIR Group Saudi Arabia
  - Advisor: Jun Chen and Mohamed Elhoseiny

Patents And Publications

Projects

- **Enhancing Multimodal Model Understanding and Generation** *Dec 2024 - Present*
  Advisor: KAUST Vision-CAIR Team
  - **Objective**: To enhance the understanding and reasoning capabilities of multimodal large models by integrating real-time web data with external knowledge exploration for more efficient augmentation.
  - **Methodology**: Developed a novel strategy leveraging web retrieval techniques to acquire knowledge related to visual prompts, enabling more precise and context-aware visual understanding while improving the reasoning abilities of multimodal models.
- **Diffusion Model for Reconstructing Chinese Characters via Content-Style Disentanglement** *May 2023 - Sep 2024*
  Advisor: Dr. James Yuan, Heriot-Watt University, UK
  - **Objective**: To design a framework inspired by pictographic Chinese characters for generating artistic works that integrate customizable elements and styles into Chinese characters.

- **Methodology**: Incorporated user-defined styles and elements into Chinese characters using a diffusion-based model, achieving a harmonious blend of tradition and innovation in Chinese character art.

- **UNet-Centric MambaMorph: A Comprehensive Visual Mamba Framework Enhanced with Cross-Scan and Semi-Supervised Learning for Medical Segmentation** *Jan. 2024 - Present*
  Fundamental Research Funds for Central Universities Research Capacity Improvement Project(Supervisor: Prof.Zhang Wenting)
  - **Purpose**: To improve medical image segmentation by enhancing global context understanding.
  - **Methods**: The integration of UNet and Mamba architectures is employed, complemented by a novel Cross-Scan module, to optimize segmentation accuracy.

- **FPGA-Based AI Doctor: Deep Learning-Based Clinical Target Delineation for Cervical Cancer** *Mar. 2024 - April. 2024*
  National College Student Innovation and Entrepreneurship Training Program(Supervisor: Prof.Wang XingHua)
  - **Purpose**: To enhance the capability of identifying subtle features in medical images.
  - **Methods**: Accomplished by refining the traditional U-Net architecture and exploiting the parallel processing capabilities of FPGA, resulting in significant improvements in feature detection.

- **Tropical Linear Representation ofInvolute Chinese Monoids** *Mar. 2023 - May. 2024*
  National College Student Innovation and Entrepreneurship Training Program(Supervisor: Prof.Zhang Wenting)
  - **Purpose**: To introduce and define the tropical linear representation within Chinese monoids of involution.
  - **Methods**: The approach encompasses the theoretical establishment of free monoids and rewriting systems, followed by the definition of their tropical linear representations for involution in Chinese monoids.

Honors And Awards

- Best Wiki Winners in International Directed Evolution Competition (IDEC) (2024) **(Top 5%)**
- Silver Medal in International Genetically Engineered Machine Competition (IGEM) (2024)**(Top 15%)**
- International College Mathematical Modeling Competition Meritorious Winner (2023) **(Top 6%)**
- Honorable Award of the American Collegiate Mathematical Contest in Modeling (MCM) (2023) **(Top 25%)**
- Best hardware Winner, Best Target Molecule Nominees & Winner, Best Genome Evolutionary Outcomes Nominees & Winner in International Directed Evolution Competition (IDEC) (2023) **(TOP 1%)**
- National First Prize in 2022 National College Student Data Analysis Competition (2022) **(Top 3%)**
- National First Prize in the National 2022 Second China University Big Data Challenge (2022) **(Top 8%)**
- Second-level Scholarship of Lanzhou University(2022,2024) **(Top 15%)**
- Outstanding Student Pacesetter of Lanzhou University(2022) **(Top 15%)**

Experience

- **SenseTime** *February 2025 - Present*
  Intern in General Perceptual Computing Research Shenzhen, China
  - Engaged in the search for understanding the latest multimodal knowledge & Research on streaming multimodal large model systems, and completed conference and journal papers.
- **King Abdullah University of Science and Technology** *Dec. 2024 - Present*
  Remote Research Intern in Vision-CAIR Group Saudi Arabia
  - Research on developing and optimizing capabilities of multimodal large models tailored for understanding up-to-date vision knowledge, and complete conference and journal papers.
- **The Chinese University of Hongkong, Shenzhen** *April. 2024 - Nov. 2024*
  Research Assistant in Laboratory for Intelligent Autonomous Systems (LIAS) at School of Data Science Shenzhen, China
  - Research on Image Detection and Human Motion Generation Model, implement the latest research results into products, and complete conference and journal papers.
- **Heriot-Watt University** *March. 2024 - Sep. 2024*
  Remote Research Intern in School of Mathematical and Computer Sciences Edinburgh, UK
  - Research on Multimodal Image Generation Models, Revitalizing Characters with Decoupled Content and Style Injection, and complete conference and journal paper.
- **iFLYTEK Co., Ltd.** *June 2023 - Aug. 2023*
  Data Analysis Assistant in Intern of Smart Home Department Lanzhou, China
  - Leveraging historical user behavior data to construct precise user profiles and predictive models, analysing to optimize marketing strategies and deliver personalized recommendations.

Skills And Services

- **Programming Languages:** Python, R, Stata, Latex
- **Languages:** Mandarin(Native), Cantonese(Native), English(Fluent)
- **Operation System:** Windows (advanced), Linux(advanced)
- **Journal Reviewer:** EMFT(Q1), ESPR(Q1), IJER(Q2), EEMJ(Q3), AEL(Q3)
- **Conference Reviewer:** CVPR(2025), ICLR(2025), ICCV(2025)
