Shenzhen, China

Research Interests

Fields: Computer Vision, Computer Graphics, Image Analysis , Economics
Topics: 2D/3D AIGC, Generative AI, Image Analysis,3D Motion Modeling, Digital Human ,Energy Economics
Objective:My long-term research goal is to develop intelligent machines that can actively perceive, analyze, and interpret human states, behaviors, and underlying motivations in dynamic scenes.

Education

- **Lanzhou University (Project 985)** *Sept. 2021 - June.2025 (Expected)*
  B.S. in Mathematics and Applied Mathematics (Main major) Lanzhou, China
  - Relevant courses: Mathematical Analysis, Advanced Algebra, C++ Programming, Probability Theory, Ordinary Differential Equations, Numerical Analysis, Microeconomics, Differential Geometry, Functional Analysis, etc.
- **The Chinese University of Hongkong, Shenzhen** *Mar. 2024 - Present*
  Research Assistant in Laboratory for Intelligent Autonomous Systems (LIAS) at School of Data Science Shenzhen, China
  - Advisor: Zhang Ruimao

Projects

- **Multi-Character Story to Motion with Decoupled Content and Style Injection** *June. 2024 - Present*
  Supervisor: Zhang Ruimao, CUHKSZ
  - **Purpose**: To generate controlled, long character actions and trajectories from long textual descriptions.
  - **Methods**: Leveraging CLIP to interpret textual descriptions, employing text-driven action retrieval to identify and sequence actions, and utilizing asymptotic mask transformer to generation of character trajectories.
- **A Generative Model for Revitalising Characters with Decoupled Content and Style Injection** *May. 2023 - Present*
  Supervisor:Yifan Yuan, Heriot-Watt University,UK
  - **Purpose**: To innovate a framework inspired by pictogram Chinese characters for generating artworks that integrate customizable elements and styles into the characters.
  - **Methods**:Integrates user-defined styles and elements into Chinese characters, harnessing advanced computation for a harmonious synthesis of tradition and innovation in character art.
- **Global Urban Sustainable Development Strategies and Empirical Research** *May. 2022 - June.2024*
  Ural Federal University Program of Development within the Priority-2030 Program(Supervisor: Prof.Zhang Guoxing)
  - **Purpose**: To analyze factors of urban green development and their impact on policy mechanisms.
  - **Methods**: Applying machine learning and data mining for pattern recognition and predictive analysis to discern both the long-term equilibrium and short-term dynamics of urban green policies.

- **FPGA-Based AI Doctor: Deep Learning-Based Clinical Target Delineation for Cervical Cancer** *Mar. 2024 - Present*
  National College Student Innovation and Entrepreneurship Training Program(Supervisor: Prof.Wang XingHua)
  - **Purpose**: To enhance the capability of identifying subtle features in medical images.
  - **Methods**: Accomplished by refining the traditional U-Net architecture and exploiting the parallel processing capabilities of FPGA, resulting in significant improvements in feature detection.
- **UNet-Centric MambaMorph: A Comprehensive Visual Mamba Framework Enhanced with Cross-Scan and Semi-Supervised Learning for Medical Segmentation** *Jan. 2024 - Present*
  Fundamental Research Funds for Central Universities Research Capacity Improvement Project(Supervisor: Prof.Zhang Wenting)
  - **Purpose**: To improve medical image segmentation by enhancing global context understanding.
  - **Methods**: The integration of UNet and Mamba architectures is employed, complemented by a novel Cross-Scan module, to optimize segmentation accuracy.
- **Recommendation Algorithm Based on Knowledge Graph and Strong-Weak Connection Attention Mechanism** *Mar. 2023 - May. 2024*
  Hui-Chun Chin and Tsung-Dao Lee Chinese Undergraduate Research Endowment(Supervisor: Prof.Su Wei)
  - **Purpose**: To refine the existing recommendation algorithm with a focus on capturing subtle user group similarities.
  - **Methods**: The approach utilizes attention mechanism-based graph convolutional networks to distill structural and directional information from graph data pertinent to user groups.
- **Intelligent Cholesterol Management System** *Jan. 2023 - Dec. 2024*
  IGEM Project(Supervisor: Prof.Li Xiangkai)
  - **Purpose**: To develop Intelligent System for oleic acid induction by engineering the FadO operator sequence.
  - **Methods**: Employing experimental verification and modeling, the system is calibrated to determine the optimal induction threshold to various human constitutions, ensuring a responsive gradient to oleic acid concentration changes.
- **Tropical Linear Representation ofInvolute Chinese Monoids** *Mar. 2023 - May. 2024*
  National College Student Innovation and Entrepreneurship Training Program(Supervisor: Prof.Zhang Wenting)
  - **Purpose**: To introduce and define the tropical linear representation within Chinese monoids of involution.
  - **Methods**: The approach encompasses the theoretical establishment of free monoids and rewriting systems, followed by the definition of their tropical linear representations for involution in Chinese monoids.

Honors And Awards

- International College Mathematical Modeling Competition Meritorious Winner (2023) **(Top 6%)**
- Honorable Award of the American Collegiate Mathematical Contest in Modeling (MCM) (2023) **(Top 25%)**
- Provincial-level Gold Medal in China College Students' 'Internet+' Innovation and Entrepreneurship Competition (2023) **(Top 1%)**
- Best hardware Winner, Best Target Molecule Nominees & Winner, Best Genome Evolutionary Outcomes Nominees & Winner in International Directed Evolution Competition (IDEC 2023) (2023) **(TOP 1%)**
- National First Prize in 2022 National College Student Data Analysis Competition (2022) **(Top 3%)**
- National First Prize in the National 2022 Second China University Big Data Challenge (2022) **(Top 8%)**
- Second-level Scholarship of Lanzhou University(2022) **(Top 15%)**
- Outstanding Student Pacesetter of Lanzhou University(2022) **(Top 15%)**

Experience

- **Heriot-Watt University,UK** *Mar. 2024 - Present*
  Remote Research Intern in School of Mathematical and Computer Sciences London, UK
  - Research on Multimodal Image Generation Models, Revitalizing Characters with Decoupled Content and Style Injection, and complete conference and journal paper.
- **The Chinese University of Hongkong, Shenzhen** *April. 2024 - Present*
  Research Assistant in Laboratory for Intelligent Autonomous Systems (LIAS) at School of Data Science Shenzhen, China
  - Research on Image Detection and Human Motion Generation Model, implement the latest research results into products, and complete conference and journal papers.
- **iFLYTEK Co., Ltd.** *June 2023 - Aug. 2023*
  Data Analysis Assistant in Intern of Smart Home Department Lanzhou, China
  - Leveraging historical user behavior data to construct precise user profiles and predictive models, analysing to optimize marketing strategies and deliver personalized recommendations.

Skills And Services

- **Programming Languages:** Python, R, C, C++, Stata, Latex
- **Languages:** Mandarin(Native), Cantonese(Native), English(Fluent)
- **Operation System:** Windows (advanced), Linux(advanced)
- **Journal Reviewer:** IJER,ESPR
